L I N C

The logo for the Leipzig Interventional Course (LINC) features the letters 'L I N C' in a bold, blue, sans-serif font. The letters are arranged horizontally, with a stylized, brush-stroke-like graphic element in shades of blue and grey that sweeps across the letters from the bottom left towards the top right, partially overlapping them.

SCIENTIFIC POSTERS

09:30 – 10:50

Moderated poster round in front of the LINC studio

JUROR:

Ralph-Ingo Rückert

Dai-Do Do

09:30 – 10:35

Endovascular surgery/aortic

09:30 – 09:35

New approach to standard access in interventional procedures A. Kaledin

09:35 – 09:40

Comparison of the impact of open and endovascular abdominal aortic aneurysm repair on renal function A. Saratzis

09:40 – 09:45

Pevar: analysis of costs and benefits compared with femoral surgery access L. Garriboli

09:45 – 09:50

Lessons learned from mid-term result of hybrid arch TEVAR and its solutions H. Matsuda

09:50 – 09:55

Long-term outcome of endovascular repair for elective and ruptured abdominal aortic aneurysms; a 15-year single centre experience P. Broos

09:55 – 10:00

Surgical options in endograft infections M. Ruffino

10:00 – 10:05

Object of study and purpose: Persistent type II endoleaks (PT2) after EVAR have been shown to correlate with aneurysm sac expansion and increased need for secondary interventions F. Bontempi

10:05 – 10:10

The Aorfix stent graft – tackling challenging anatomy with favourable medium term outcomes K. Augustine

10:10 – 10:15

Robotic routing in complex aortic intervention

Thomas Nolte

10:15 – 10:20

Two year experience repairing common iliac aneurysms with a modified endograft that compartmentalizes iliac flow through upstream bifurcation

Patrick Kelly

10:20 – 10:25

Background: Endovascular aneurysm repair (EVAR) has been suggested in several studies to be superior to open surgery repair (OSR) for the treatment of ruptured abdominal aortic aneurysms (rAAAs), but this finding might be affected by selection bias based on aneurysm morphology and patient characteristics. We tested rAAA anatomy according to EVAR suitability in patients undergoing OSR to assess the impact on mortality F. Krenzien

10:25 – 10:50

Miscellaneous

We are asking all faculty members to strictly respect the given time limits.

- | | |
|---------------|--|
| 10:25 – 10:30 | Introduction – Supervised exercise therapy (SET) is the primary treatment for intermittent claudication (IC). The aim of this study was to calculate annual savings if a stepped care model (SCM, primary SET treatment followed by revascularization in case of SET failure) would have been followed H. Fokkenrood |
| 10:30 – 10:35 | The impact of Vascular Chronic Q fever Infections: lessons learned from the world's largest outbreak P. Broos |
| 10:35 – 10:40 | Acute Mesenteric ischemia – surgical management and outcomes T. Sahu |
| 10:40 – 10:45 | Clinical outcomes of less invasive endovascular treatment in the patient of peripheral arterial disease K. Hozawa |
| 10:45 – 10:50 | Clinical results of infrapopliteal PTA and association of risk factors with primary patency and limb salvage in the patients of hemodialysis K. Hozawa |

We are asking all faculty members to strictly respect the given time limits.

MAIN ARENA 2

- 15:00 – 16:30** **Symposium: Sealing is believing**
supported with an unrestricted educational grant by Trivascular
CHAIRMAN:
Dierk Scheinert
MODERATOR:
Thomas Nolte
Matthias Tenholt
Sean Lyden
- 15:00 – 15:05 Introduction by the chairman
- 15:05 – 15:15 3 years of experience with an innovative sealing concept
Thomas Nolte
- 15:15 – 15:35 Live case transmission from Leipzig
- 15:35 – 15:45 Early and midterm results of a 500 patients registry
Matthias Tenholt
- 15:45 – 15:55 Expanding EVAR safely: The Ovation prime™ abdominal stentgraft system
Sean Lyden
- 15:55 – 16:20 Live case transmission from Leipzig
- 16:20 – 16:30 Future outlook: Next generation stentgraft technology
Dierk Scheinert

We are asking all faculty members to strictly respect the given time limits.
