DISCUSSION FORUM

- 12:30 – 13:30** **The optimal treatment approach for highly calcific lesions**
CHAIRMAN:
Michael Jaff
DISCUSSANT:
Gary Ansel
Lawrence Garcia
Fabrizio Fanelli
Chris Metzger
Patrick Peeters
- 12:58 – 13:05 Don't stretch the limits too far! Surgery is still a good option if endovascular fails.
Patrick Peeters
- 13:05 – 13:30 Discussion and conclusion
- 12:51 – 12:58 A mechanical challenge should be treated mechanically: Interwoven nitinol-stents with high flexibility and radial strength are the solution!
Chris Metzger
- 12:44 – 12:51 Is there a role for DEB in calcified arteries?
Fabrizio Fanelli
- 12:37 – 12:44 Atherectomy for calcified lesions: Which device works best for which lesion?
Lawrence Garcia
- 12:30 – 12:37 Crossing highly calcified lesions: This is what works best in my hands
Gary Ansel

We are asking all faculty members to strictly respect the given time limits.
