SCIENTIFIC POSTERS

09:30 – 10:50 Moderated poster round in front of the LINC studio

JUROR:

Ralph-Ingo Rückert

Dai-Do Do

10:25 – 10:50

Miscellaneous

10:20 – 10:25

Background: Endovascular aneurysm repair (EVAR) has been suggested in several studies to be superior to open surgery repair (OSR) for the treatment of ruptured abdominal aortic aneurysms (rAAAs), but this finding might be affected by selection bias based on aneurysm morphology and patient characteristics. We tested rAAA anatomy according to EVAR suitability in patients undergoing OSR to assess the impact on mortality F. Krenzien

10:15 – 10:20

Two year experience repairing common iliac aneurysms with a modified endograft that compartmentalizes iliac flow through upstream bifurcation

Patrick Kelly

10:25 – 10:30

Introduction – Supervised exercise therapy (SET) is the primary treatment for intermittent claudication (IC). The aim of this study was to calculate annual savings if a stepped care model (SCM, primary SET treatment followed by revascularization in case of SET failure) would have been followed H. Fokkenrood

10:30 – 10:35

The impact of Vascular Chronic Q fever Infections: lessons learned from the world's largest outbreak P. Broos

10:45 – 10:50

Clinical results of infrapopliteal PTA and association of risk factors with primary patency and limb salvage in the patients of hemodialysis K. Hozawa

10:40 – 10:45

Clinical outcomes of less invasive endovascular treatment in the patient of peripheral arterial disease K. Hozawa

10:35 – 10:40

Acute Mesenteric ischemia – surgical management and outcomes T. Sahu

10:10 – 10:15

Robotic routing in complex aortic intervention

Thomas Nolte

10:05 – 10:10

The Aorfix stent graft – tackling challenging anatomy with favourable medium term outcomes K. Augustine

09:40 – 09:45

Pevar: analysis of costs and benefits compared with femoral surgery access L. Garriboli

We are asking all faculty members to strictly respect the given time limits.

- | | |
|---------------|---|
| 09:35 – 09:40 | Comparison of the impact of open and endovascular abdominal aortic aneurysm repair on renal function A. Saratzis |
| 09:30 – 09:35 | New approach to standard access in interventional procedures A. Kaledin |
| 09:45 – 09:50 | Lessons learned from mid-term result of hybrid arch TEVAR and its solutions H. Matsuda |
| 09:50 – 09:55 | Long-term outcome of endovascular repair for elective and ruptured abdominal aortic aneurysms; a 15-year single centre experience P. Broos |
| 10:00 – 10:05 | Object of study and purpose: Persistent type II endoleaks (PT ₂) after EVAR have been shown to correlate with aneurysm sac expansion and increased need for secondary interventions F. Bontempi |
| 09:55 – 10:00 | Surgical options in endograft infections M. Ruffino |
| 09:30 – 10:35 | Endovascular surgery/aortic |

We are asking all faculty members to strictly respect the given time limits.

MAIN ARENA 2

- 15:00 – 16:30** **Symposium: Sealing is believing**
supported with an unrestricted educational grant by Trivascular
CHAIRMAN:
Dierk Scheinert
MODERATOR:
Thomas Nolte
Matthias Tenholt
Sean Lyden
- 15:55 – 16:20 Live case transmission from Leipzig
- 16:20 – 16:30 Future outlook: Next generation stentgraft technology
Dierk Scheinert
- 15:45 – 15:55 Expanding EVAR safely: The Ovation prime™ abdominal stentgraft system
Sean Lyden
- 15:35 – 15:45 Early and midterm results of a 500 patients registry
Matthias Tenholt
- 15:05 – 15:15 3 years of experience with an innovative sealing concept
Thomas Nolte
- 15:15 – 15:35 Live case transmission from Leipzig
- 15:00 – 15:05 Introduction by the chairman

We are asking all faculty members to strictly respect the given time limits.
