SCIENTIFIC POSTERS

09:30 – 10:50 Moderated poster round in front of the LINC studio

JUROR:

Ralph-Ingo Rückert

Dai-Do Do

- | | |
|---------------|--|
| 10:25 – 10:50 | Miscellaneous |
| 10:20 – 10:25 | Background: Endovascular aneurysm repair (EVAR) has been suggested in several studies to be superior to open surgery repair (OSR) for the treatment of ruptured abdominal aortic aneurysms (rAAAs), but this finding might be affected by selection bias based on aneurysm morphology and patient characteristics. We tested rAAA anatomy according to EVAR suitability in patients undergoing OSR to assess the impact on mortality F. Krenzien |
| 10:15 – 10:20 | Two year experience repairing common iliac aneurysms with a modified endograft that compartmentalizes iliac flow through upstream bifurcation Patrick Kelly |
| 10:25 – 10:30 | Introduction – Supervised exercise therapy (SET) is the primary treatment for intermittent claudication (IC). The aim of this study was to calculate annual savings if a stepped care model (SCM, primary SET treatment followed by revascularization in case of SET failure) would have been followed H. Fokkenrood |
| 10:30 – 10:35 | The impact of Vascular Chronic Q fever Infections: lessons learned from the world's largest outbreak P. Broos |
| 10:45 – 10:50 | Clinical results of infrapopliteal PTA and association of risk factors with primary patency and limb salvage in the patients of hemodialysis K. Hozawa |
| 10:40 – 10:45 | Clinical outcomes of less invasive endovascular treatment in the patient of peripheral arterial disease K. Hozawa |
| 10:35 – 10:40 | Acute Mesenteric ischemia – surgical management and outcomes T. Sahu |
| 10:10 – 10:15 | Robotic routing in complex aortic intervention Thomas Nolte |
| 10:05 – 10:10 | The Aorfix stent graft – tackling challenging anatomy with favourable medium term outcomes K. Augustine |
| 09:40 – 09:45 | Pevar: analysis of costs and benefits compared with femoral surgery access L. Garriboli |

We are asking all faculty members to strictly respect the given time limits.

- | | |
|---------------|---|
| 09:35 – 09:40 | Comparison of the impact of open and endovascular abdominal aortic aneurysm repair on renal function A. Saratzis |
| 09:30 – 09:35 | New approach to standard access in interventional procedures A. Kaledin |
| 09:45 – 09:50 | Lessons learned from mid-term result of hybrid arch TEVAR and its solutions H. Matsuda |
| 09:50 – 09:55 | Long-term outcome of endovascular repair for elective and ruptured abdominal aortic aneurysms; a 15-year single centre experience P. Broos |
| 10:00 – 10:05 | Object of study and purpose: Persistent type II endoleaks (PT ₂) after EVAR have been shown to correlate with aneurysm sac expansion and increased need for secondary interventions F. Bontempi |
| 09:55 – 10:00 | Surgical options in endograft infections M. Ruffino |
| 09:30 – 10:35 | Endovascular surgery/aortic |

We are asking all faculty members to strictly respect the given time limits.

TECHNICAL FORUM

- 16:30 – 18:00** **The last frontiers: Long SFA occlusions and calcified lesions**
CHAIRMAN:
Karl-Ludwig Schulte
Chris Metzger
MODERATOR:
Ralph-Ingo Rückert
Amman Bolia
Patrick Peeters
- 17:20 – 17:27 The Freeway study projects – status update
Karl-Ludwig Schulte
- 17:27 – 17:34 Patient-tailored solutions for calcified femoropopliteal lesions
Craig Walker
- 17:34 – 17:53 Live case transmission from Leipzig
- 17:53 – 18:00 Vessel scoring + DEB – the solution for complex lesions?
Erwin Blessing
- 17:15 – 17:20 First results of the RAPID trial, RCT with use of the Lefflow DEB for long-segment SFA obstructions
Via satellite from Leipzig cathlab
Daniel van den Heuvel
- 16:56 – 17:15 Live case transmission from Berlin
- 16:37 – 16:44 Is there a role for drug eluting stents in SFA treatment?
Yann Gouëffic
- 16:44 – 16:49 12 months results with Zilver PTX in long femoropopliteal lesions
Thomas Zeller
- 16:49 – 16:56 New concepts for DES in femoropopliteal arteries - the Illumina trial
Dierk Scheinert
- 16:30 – 16:37 2000 patients, real-world nitinol stent registry – 1 year results
Johannes Ruef

We are asking all faculty members to strictly respect the given time limits.

GLOBAL EXPERT EXCHANGE

12:35 – 13:05

Challenging EVAR cases and complications – Part II

CHAIRMAN:

Piergiorgio Cao

Patrick Kelly

MODERATOR:

Dieter Raihnel

Ralph-Ingo Rückert

12:55 – 13:00

Contra-lateral limb cannulation technique during EVAR for hostile neck

13:00 – 13:05

Techniques for successful percutaneous EVAR

12:50 – 12:55

First-in-man use of Endologix VELA cuff: Our initial experience with the world's first four cases

12:45 – 12:50

Novel measure to counter access trouble in TEVAR cases - external iliac artery approach using TRIMLINE vertebral retractor

12:40 – 12:45

Repair of innominate artery pseudoaneurysm and tracheo-innominate fistula with a modified endovascular graft

12:35 – 12:40

Outcomes of intentional left subclavian artery coverage during TEVAR in patients with traumatic aortic injury – a quality of life study

We are asking all faculty members to strictly respect the given time limits.

MAIN ARENA 1

- 16:30 – 18:00** **The last frontier: Endovascular interventions in the common femoral and popliteal arteries**
CHAIRMAN:
Barry Katzen
MODERATOR:
Reza Ghotbi
Patrick Peeters
Chris Metzger
Ralph-Ingo Rückert
Peter Schneider
- 17:22 – 17:27 Entrapment syndrome of the popliteal artery – diagnostic work-up and treatment
Ralph-Ingo Rückert
- 17:27 – 17:53 Live case transmission from Leipzig
- 17:53 – 18:00 Endovascular repair of popliteal artery aneurysms: Technical considerations, patient selection, and outcome
Barry Katzen
- 17:17 – 17:22 The Leipzig SUPERA Popliteal artery stent registry - long-term results
Johannes Schuster
- 17:12 – 17:17 Clinical trial update: The Durability Pop study – 2 year results
Patrick Peeters
- 16:35 – 17:00 Live case transmission from Bad Krozingen
- 17:00 – 17:07 Anatomical and biomechanical specifics of the popliteal artery
Stefan Müller-Hülsbeck
- 17:07 – 17:12 Clinical trial update: ETAP randomized clinical trial: 24 months update
Via satellite from Bad Krozingen
Thomas Zeller
- 16:30 – 16:35 The TECCO trial: results of the French multicentric randomized clinical trial comparing endovascular vs. open surgery for the treatment of common femoral artery de novo lesions
Yann Gouëffic

We are asking all faculty members to strictly respect the given time limits.
