SCIENTIFIC POSTERS

09:30 – 10:50 Moderated poster round in front of the LINC studio

JUROR:

Ralph-Ingo Rückert

Dai-Do Do

10:25 – 10:50

Miscellaneous

10:20 – 10:25

Background: Endovascular aneurysm repair (EVAR) has been suggested in several studies to be superior to open surgery repair (OSR) for the treatment of ruptured abdominal aortic aneurysms (rAAAs), but this finding might be affected by selection bias based on aneurysm morphology and patient characteristics. We tested rAAA anatomy according to EVAR suitability in patients undergoing OSR to assess the impact on mortality F. Krenzien

10:15 – 10:20

Two year experience repairing common iliac aneurysms with a modified endograft that compartmentalizes iliac flow through upstream bifurcation

Patrick Kelly

10:25 – 10:30

Introduction – Supervised exercise therapy (SET) is the primary treatment for intermittent claudication (IC). The aim of this study was to calculate annual savings if a stepped care model (SCM, primary SET treatment followed by revascularization in case of SET failure) would have been followed H. Fokkenrood

10:30 – 10:35

The impact of Vascular Chronic Q fever Infections: lessons learned from the world's largest outbreak P. Broos

10:45 – 10:50

Clinical results of infrapopliteal PTA and association of risk factors with primary patency and limb salvage in the patients of hemodialysis K. Hozawa

10:40 – 10:45

Clinical outcomes of less invasive endovascular treatment in the patient of peripheral arterial disease K. Hozawa

10:35 – 10:40

Acute Mesenteric ischemia – surgical management and outcomes T. Sahu

10:10 – 10:15

Robotic routing in complex aortic intervention

Thomas Nolte

10:05 – 10:10

The Aorfix stent graft – tackling challenging anatomy with favourable medium term outcomes K. Augustine

09:40 – 09:45

Pevar: analysis of costs and benefits compared with femoral surgery access L. Garriboli

We are asking all faculty members to strictly respect the given time limits.

Wednesday, January 29, 2014

- | | |
|---------------|--|
| 09:35 – 09:40 | Comparison of the impact of open and endovascular abdominal aortic aneurysm repair on renal function A. Saratzis |
| 09:30 – 09:35 | New approach to standard access in interventional procedures A. Kaledin |
| 09:45 – 09:50 | Lessons learned from mid-term result of hybrid arch TEVAR and its solutions H. Matsuda |
| 09:50 – 09:55 | Long-term outcome of endovascular repair for elective and ruptured abdominal aortic aneurysms; a 15-year single centre experience P. Broos |
| 10:00 – 10:05 | Object of study and purpose: Persistent type II endoleaks (PT2) after EVAR have been shown to correlate with aneurysm sac expansion and increased need for secondary interventions F. Bontempi |
| 09:55 – 10:00 | Surgical options in endograft infections M. Ruffino |
| 09:30 – 10:35 | Endovascular surgery/aortic |

We are asking all faculty members to strictly respect the given time limits.

L I N C

The logo for the Leipzig Interventional Course (LINC) features the letters 'L I N C' in a bold, sans-serif font. A large, dark blue, brush-stroke-like graphic element curves behind the letters, starting from the bottom left and sweeping upwards and to the right, passing behind the 'I' and 'N'.

SCIENTIFIC POSTERS

- 09:30 – 10:50** **Challenging Cases and Complications - Moderated poster round in front of the LINC studio**
JUROR:
Peter Schneider
Vicente Riambau
- 10:30 – 10:35 Evar in pelvi kidney A. Lemos Junior
- 10:25 – 10:30 Endovascular treatment of massive hemoptysis by bronchial artery embolization A. Svare
- 10:20 – 10:25 Muscular flap for treatment of secondary aorto-esophageal fistula after thoracic endovascular aortic repair J. Ruiz
- 10:20 – 10:35 PVD/aorto-iliac
- 10:35 – 10:40 PVD/below the knee
- 10:35 – 10:40 Complex btk treatment: recanalization via a collateral artery - what is possible with modern guidewires and catheters? C. Lüdtke
- 10:45 – 10:50 Complete endovascular iliofemoropopliteal recanalisation B. Moors
- 10:40 – 10:45 Complications bonded to popliteal artery injury are a rare event that can occur during or after the knee surgery L. Garriboli
- 10:40 – 10:50 PVD/femoro-popliteal
- 10:15 – 10:20 Thoraco-abdominal dissection and thrombosis of the aortic graft in a patient previously treated for acute type B dissection. A. Malaj
- 10:10 – 10:15 Endovascular treatment pseudoaneurysm of the right iliac artery with arteriovenous fistula arose after spinal disc surgery M. Generalov
- 09:45 – 09:50 Endovascular repair for severe late failure of Zenith stent graft 2000 model S. Onozawa
- 09:40 – 09:45 Bilateral iliac recanalization for management of limb ischemia in patient with type A aortic dissection P. Rodríguez
- 09:35 – 09:40 Modified hybrid debranching technique to treat large subclavian artery aneurysm A. Saratzis
- 09:30 – 09:35 Emergency repair of a giant renal arterio-venous fistula with a wideneck using amplatzer plugs A. Saratzis

We are asking all faculty members to strictly respect the given time limits.

Thursday, January 30, 2014

- | | |
|---------------|--|
| 09:50 – 09:55 | Total endovascular repair of a ruptured abdominal aortic aneurysm with aortocaval fistula E. Willigendael |
| 09:55 – 10:00 | Complete endovascular aortic arch aneurysm repair
Patrick Kelly |
| 10:10 – 10:20 | Miscellaneous |
| 10:05 – 10:10 | TAA or malignancy S. Navaratne |
| 10:00 – 10:05 | Struggling with delivery system removal: a challenging technical issue during endovascular aortic aneurysm repair (EVAR) for AAA with severe neck angulation K. Hongku |
| 09:30 – 10:15 | Endovascular surgery/aortic |

We are asking all faculty members to strictly respect the given time limits.

GLOBAL EXPERT EXCHANGE

12:35 – 13:05

Challenging EVAR cases and complications – Part II

CHAIRMAN:

Piergiorgio Cao

Patrick Kelly

MODERATOR:

Dieter Raihnel

Ralph-Ingo Rückert

12:55 – 13:00

Contra-lateral limb cannulation technique during EVAR for hostile neck

13:00 – 13:05

Techniques for successful percutaneous EVAR

12:50 – 12:55

First-in-man use of Endologix VELA cuff: Our initial experience with the world's first four cases

12:45 – 12:50

Novel measure to counter access trouble in TEVAR cases - external iliac artery approach using TRIMLINE vertebral retractor

12:40 – 12:45

Repair of innominate artery pseudoaneurysm and tracheo-innominate fistula with a modified endovascular graft

12:35 – 12:40

Outcomes of intentional left subclavian artery coverage during TEVAR in patients with traumatic aortic injury – a quality of life study

We are asking all faculty members to strictly respect the given time limits.

MAIN ARENA 1

09:00 – 12:15

Critical issues in aortic endografting

CHAIRMAN:

Michel Makaroun
Roberto Chiesa

MODERATOR:

Marc van Sambeek
Steven Kum
Eric Verhoeven
Giovanni Torsello
Armando Lobato

11:16 – 11:24

Retrograde Type A dissections after EVAR – insights from surgical re-do procedures

Michael Borger

11:08 – 11:16

Update on understanding and management of PAU and IMH

Frank Criado

11:00 – 11:08

My experience with parallel graft techniques as an off-the-shelf solution for complex aortic aneurysms

Armando Lobato

11:24 – 11:43

Live case transmission from Münster

11:43 – 11:51

Prevention and treatment of Type I endoleaks with the Aptus system

Piotr Kasprzak

12:07 – 12:15

9-year experience with the use of iliac side branch devices in more than 160 patients

Giovanni Torsello

11:59 – 12:07

Innovative system for iliac branch procedures: The new GORE® EXCLUDER® iliac branch endoprosthesis

Fabio Verzini

11:51 – 11:59

Late Type I endoleak are better treatable by chimneys

Konstantinos Donas

10:52 – 11:00

Custom-made vs. off-the-shelf multibranched endografts for endovascular repair of TAAA

Via satellite from Münster

Martin Austermann

We are asking all faculty members to strictly respect the given time limits.

Friday, January 31, 2014

- | | |
|---------------|---|
| 10:44 – 10:52 | One year experience with complete endovascular repair of thoracoabdominal aneurysms by compartmentalizing aortic flow
Patrick Kelly |
| 09:36 – 09:44 | Long-term results with the Endurant stentgraft: The Muenster single center experience with 700+ patients
Theodosios Bisdas |
| 09:28 – 09:36 | Scientific and clinical value of contemporary EVAR post market registries: The ENGAGE case example
Hence Verhagen |
| 09:20 – 09:28 | EVAR improves outcomes of elective and ruptured AAA
Marc Schermerhorn |
| 09:44 – 09:52 | The real life GORE® GREAT registry: Latest clinical evidence and ongoing modules
Patrick Vriens |
| 09:52 – 10:00 | TREOVANCE in EVAR: Latest results on ADVANCE, BENEFIT and RATIONALE clinical studies
Vicente Riambau |
| 10:16 – 10:44 | Live case transmission from Leipzig |
| 10:08 – 10:16 | Thinking out of the box: innovative solutions for challenging EVAR cases - Nellix and beyond
Dittmar Böckler |
| 10:00 – 10:08 | Multicenter registry to evaluate the performance of chimney and periscope grafts
Konstantinos Donas |
| 09:00 – 09:20 | Live case transmission from Münster |

We are asking all faculty members to strictly respect the given time limits.

TECHNICAL FORUM

- 09:00 – 12:00** **Challenging cases and complications: Great saves and big disasters**
CHAIRMAN:
Giancarlo Biamino
MODERATOR:
Claudio Rabbia
Chris Metzger
Gioachino Coppi
- 11:06 – 11:14 Usefulness of percutaneous direct needle puncture technique during recanalization of heavily calcified plaques of hemodialysis patients.
Tomoyasu Sato
- 10:36 – 11:06 Live case transmission from Leipzig
- 11:14 – 11:22 Challenges while excluding supra-aortic aneurysms with difficult proximal control
Ahmed Sayed
- 11:22 – 11:30 Emergent triple back table graft fenestration for chronic dissection with rapid expansion
Claes Forssell
- 11:55 – 12:00 Conclusion and Adjourn
- 11:30 – 11:55 Live case transmission from Leipzig
- 10:28 – 10:36 Vascular malformations - overview and treatment options
Robert Clemens
- 10:20 – 10:28 Treatment of a perirenal aortic aneurysm without iliaco-femoral access followed by branched endograft infection caused by an aortoduodenal fistula
Reinhard Kopp
- 09:13 – 09:21 Complete endovascular repair of an arch aneurysm by compartmentalising aortic flow: a case report
Patrick Kelly
- 09:05 – 09:13 Endovascular treatment is an accurate option for aortoenteric secondary fistula in TASC D patients
Enrique San Norberto-García
- 09:21 – 09:56 Live case transmission from Leipzig

We are asking all faculty members to strictly respect the given time limits.
