|              | **CHAIRMAN:** Yoshiaki Yokoi, Giancarlo Biamino  
**MODERATOR:** Steve Ramee, Thomas Rand                                              |
| 16:00 – 17:00| **Critical Limb Ischemia**                                                                                                               |
| 16:00 – 16:05| **Lack of PAD awareness amongst physicians treating diabetes and end stage renal disease. Results of multi-region survey in the USA**  
Paramjit Chopra                                                             |
| 16:05 – 16:10| **Routine strategy of coronary angiography in patients with critical limb ischemia**                                                      
*Michael Lee*                                                                |
| 16:10 – 16:15| **The vascular team – how to improve outcomes in critical limb ischemia by integrating vascular medicine and surgery services**        
Leonardo Clavijo                                                             |
| 16:15 – 16:20| **Importance of infrapopliteal angioplasty based on the angiosome concept for critical foot ischemia**                                     
Donghua Ji                                                                  |
| 16:20 – 16:25| **Impact of the below-the-ankle angioplasty for ischemic foot**                                                                           
Tatsuya Nakama                                                              |
| 16:25 – 16:30| **Endovascular treatment in foot arteries beyond pedal arch**                                                                           
Sang Woo Park                                                               |
| 16:30 – 17:00| **Discussion and conclusion**                                                                                                             |

We are asking all faculty members to strictly respect the given time limits.
