# Latest insights from cardiovascular clinical trials

**Chairman:** William Gray  
**Moderators:** Felix Mahfoud, Dietrich Pfeiffer, Dariusz Dudek, Joachim Schofer, Christian Etz

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
</tr>
</thead>
</table>
| 13:30  | After SIMPLICITY III: Is there a future for catheter-based therapy of arterial hypertension?  
Michael Böhm |
| 13:37  | Review of results of the European, randomized trial of AV anastomosis with the ROX coupler for resistant hypertension  
Paul Sobotka |
| 13:42  | Live case transmission from Leipzig Heartcenter  
Joachim Schofer |
| 13:47  | The role of TAVI in high-risk and normal-risk patients  
Joachim Schofer |
| 14:00  | Echocardiographic criteria for favourable TAVI outcome – can we predict the risk?  
Andreas Hagendorff |
| 14:17  | Cerebral protection during TAVI – the CLEAN-TAVI trial  
Stephan Hausig |
| 14:22  | Live case transmission from Leipzig  
Dietrich Pfeiffer |
| 14:41  | Stroke prevention in patients with atrial fibrillation: When and how to use left atrium appendix closure?  
Philipp Sommer |
| 14:48  | Current status of ablation therapy for atrial fibrillation  
Philipp Sommer |
| 15:00  | Discussion and conclusion |
