### SCIENTIFIC POSTERS

13:00 – 14:10

#### Original research: EVAR

*JUROR:*

**Santi Trimarchi**

Fabio Verzini

13:00 – 13:05

Renal function in endovascular aneurysm sealing repair: a retrospective analysis

Fahad Iqbal

13:05 – 13:10

Early results of endovascular treatment of post aortic dissection aneurysm using physician-modified fenestrated stent-grafts

Min Zhou

13:10 – 13:15

Adjuncts to suture-based vascular closure devices increase successful femoral closure rate in percutaneous Endovascular Aneurysm Repair (pEVAR)

Selva Theivacumar

13:15 – 13:20

Feasibility and early results of a new generation candy plug ii for endovascular false lumen occlusion with TEVAR in chronic aortic dissection

Ahmed Eleshra

13:20 – 13:25

Results of standard endovascular aneurysm repair (EVAR) for ruptured very short neck abdominal aortic aneurysms (AAAs)

Arkom Suesawatee

13:25 – 13:30

Endovascular aortic repair for infra-renal abdominal aortic aneurysms: Outcomes of the Bi- vs. Trimodular Endurant® stent-graft

Susanne Anton

13:30 – 13:35

Geometric & hemodynamic analysis of fenestrated and multibranched aortic endografts

Liliana Fidalgo Domingos

13:35 – 13:40

Retrospective analysis of the effect of fibrinogen level on outcomes in abdominal aortic aneurysm repair

Miriam O'Sullivan

13:40 – 13:45

Outcomes of percutaneous endovascular repair of thoracic and thoraco-abdominal aneurysms with larger introducers and in patients with previous open or percutaneous accesses

Andrea Melloni

**We are asking all faculty members to strictly respect the given time limits.**

## Thursday, January 24, 2019

- |               |   |
|---------------|---|
| 13:45 – 13:50 | Selective vs. routine preoperative coronary computerized tomography angiography for patients undergoing thoracoabdominal aortic aneurysm open repair<br>Vincenzo Ardita         |
| 13:50 – 13:55 | Endovascular treatment of isolated common iliac artery aneurysms using iliac branch stent-grafts without aortic component: a national multicenter registry<br>Alessia Giaquinta |
| 13:55 – 14:00 | Renal function after open repair of proximal abdominal aneurysms analyzed according to different vessels revascularisation technique<br>Alessandro Grandi                       |
| 14:00 – 14:05 | Different approach to the treatment of complex aortic arch aneurysms – TEVAR with or without open great vessel debranching<br>Piotr Szopi ski                                   |
| 14:05 – 14:10 | Postoperative CT findings and renal functional change after left renal vein division during abdominal aortic surgery<br>Dongho Hyun   |

We are asking all faculty members to strictly respect the given time limits.

## ROOM 2 - MAIN ARENA 2

- 15:00 – 16:00**      **Symposium: The freedom to do more in TEVAR: New evidence and solutions to improve patient outcomes**  
sponsored by Medtronic  
*MODERATOR:*  
Dittmar Böckler  
*PANEL:*  
**Santi Trimarchi**  
Paul Hayes  
Fabio Verzini  
Luigi Lovato
- 15:00 – 15:08      When and how to perform TEVAR: evidence based insights  
**Santi Trimarchi**
- 15:08 – 15:16      Addressing unmet clinical needs with the new generation Valiant Navion™ device  
Paul Hayes
- 15:16 – 15:24      30-day results on the Valiant Navion™ device  
Fabio Verzini
- 15:24 – 15:49      Recorded case presentation: Valiant Navion™ device enhancements: A case-based approach to Navion's clinical value  
Luigi Lovato
- 15:49 – 16:00      Discussion and conclusion

We are asking all faculty members to strictly respect the given time limits.
