SCIENTIFIC POSTERS

09:00 – 10:30 Original research: PVD, SFA, femoral

JUROR:

John Laird

Lawrence Garcia

- 09:00 – 09:05 The effect of supervised exercise on biomarker levels in individuals with peripheral arterial disease – a systematic review
Osama Albazde
- 09:05 – 09:10 Day-Case Treatment of PAD: Single-tertiary center experience
S. Binkhamis
- 09:10 – 09:15 Improving balloon angioplasty: Lessons learned from the DCB and stent trials
Ronald Solar
- 09:15 – 09:20 Incidence and predictors of access site pseudoaneurysm in peripheral arterial disease therapeutic angioplasty
Ahmed Eleshra
- 09:20 – 09:25 Preliminary results of the Italian multicentre registry using a dual component vascular stent for the treatment of distal SFA with or without involvement of popliteal artery
Maria Antonella Ruffino
- 09:25 – 09:30 Comparison of endovascular recanalisation vs. open bypass surgery for infra-inguinal Trans-Atlantic Inter-Society Consensus (TASC) – D arterial lesions – a retrospective comparative study
Ondrej Stehno
- 09:30 – 09:35 Diagnostic and surgical experience with Popliteal Artery Entrapment Syndrome PAES in one single clinical center
Sun Rui
- 09:35 – 09:40 Post-dilatation of an interwoven nitinol stent using a paclitaxel-eluting balloon for revascularisation of complex femoro-popliteal lesions
Erik Stahlberg
- 09:40 – 09:45 Predictors of severe dissection after plain balloon angioplasty for superficial femoral artery disease
Takenobu Shimada

We are asking all faculty members to strictly respect the given time limits.

PROGRAMME

LEIPZIG INTERVENTIONAL COURSE

LINIC

Yoshito Yamamoto

Page 2/2

Wednesday, January 31, 2018

- | | |
|---------------|---|
| 09:45 – 09:50 | Outcomes of endovascular treatment for TASC-II D femoropopliteal occlusive disease
Veera Suwanruangsri |
| 09:50 – 09:55 | Successful endovascular treatment with the phoenix atherectomy system in patients with chronic limb ischemia. A mini-series of thirteen consecutive patients.
Grigorios Korosoglou |
| 09:55 – 10:00 | Risk factors for restenosis after drug-coated balloon angioplasty for complex femoropopliteal artery diseases
Young-Guk Ko |
| 10:00 – 10:05 | Endovascular management of femoropopliteal TASCII C and D lesions
Amr Aborahma |
| 10:05 – 10:10 | Drug eluting balloon angioplasty versus bare metal stenting in treating femoro-popliteal occlusive disease
Ahmed Allam |
| 10:10 – 10:15 | Clinical outcomes and risk factor analysis of restenosis after endovascular treatment of femoro-popliteal lesions using atherectomy device
Seon-Hee Heo |
| 10:15 – 10:20 | Comparative biomechanics and vascular healing response of 3 contemporary stents in balloon-predilated femoral arteries of familial hypercholesterolemic swine
Miguel Montero-Baker |
| 10:20 – 10:25 | Stent expansion in superficial femoral artery will improve as round shape after long term period even in the case of eccentric plaque distribution – IVUS confirmation
Yoshito Yamamoto |
| 10:25 – 10:30 | Experience of endovascular techniques in treatment of long superficial femoral artery occlusions
D. Chernova |

We are asking all faculty members to strictly respect the given time limits.
