## SCIENTIFIC POSTERS

### 09:00 – 10:40 **Original research: PVD, SFA, femoral**

*JUROR:*

John Laird

Lawrence Garcia

- 09:00 – 09:05 The effect of supervised exercise on biomarker levels in individuals with peripheral arterial disease – a systematic review  
Osama Albazde
- 09:05 – 09:10 Day-Case Treatment of PAD: Single-tertiary center experience  
Amr Elsaadany
- 09:10 – 09:15 Improving balloon angioplasty: Lessons learned from the DCB and stent trials  
Ronald Solar
- 09:15 – 09:20 Incidence and predictors of access site pseudoaneurysm in peripheral arterial disease therapeutic angioplasty  
Ahmed Eleshra
- 09:20 – 09:25 Preliminary results of the Italian multicentre registry using a dual component vascular stent for the treatment of distal SFA with or without involvement of popliteal artery  
Maria Antonella Ruffino
- 09:25 – 09:30 Comparison of endovascular recanalisation vs. open bypass surgery for infra-inguinal Trans-Atlantic Inter-Society Consensus (TASC) – D arterial lesions – a retrospective comparative study  
Ondrej Stehno
- 09:30 – 09:35 2-year outcomes in patients with long severe femoro-popliteal lesions  
TBD
- 09:35 – 09:40 Diagnostic and surgical experience with Popliteal Artery Entrapment Syndrome PAES in one single clinical center  
Sun Rui
- 09:40 – 09:45 Post-dilatation of an interwoven nitinol stent using a paclitaxel-eluting balloon for revascularisation of complex femoro-popliteal lesions  
Erik Stahlberg

We are asking all faculty members to strictly respect the given time limits.

## Wednesday, January 31, 2018

- 09:45 – 09:50 Predictors of severe dissection after plain balloon angioplasty for superficial femoral artery disease  
Takenobu Shimada
- 09:50 – 09:55 Outcomes of endovascular treatment for TASC-II D femoropopliteal occlusive disease  
Veera Suwanruangsri
- 09:55 – 10:00 Successful endovascular treatment with the phoenix atherectomy system in patients with chronic limb ischemia. A mini-series of thirteen consecutive patients.  
Grigorios Korosoglou
- 10:00 – 10:05 Risk factors for restenosis after drug-coated balloon angioplasty for complex femoropopliteal artery diseases  
Young-Guk Ko
- 10:05 – 10:10 Endovascular management of femoropopliteal TASCII C and D lesions  
Amr Aborahma
- 10:10 – 10:15 Drug eluting balloon angioplasty versus bare metal stenting in treating femoro-popliteal occlusive disease  
Ahmed Allam
- 10:15 – 10:20 Clinical outcomes and risk factor analysis of restenosis after endovascular treatment of femoro-popliteal lesions using atherectomy device  
Seon-Hee Heo
- 10:20 – 10:25 Comparative biomechanics and vascular healing response of 3 contemporary stents in balloon-predilated femoral arteries of familial hypercholesterolemic swine  
Miguel Montero-Baker
- 10:25 – 10:30 Stent expansion in superficial femoral artery will improve as round shape after long term period even in the case of eccentric plaque distribution – IVUS confirmation  
**Yoshito Yamamoto**
- 10:30 – 10:35 Innovative trans-palmar approach for coronary angiography and intervention: access via superficial palmar branch of ulnar artery  
Farshad Roghani-Dehkordi
- 10:35 – 10:40 Experience of endovascular techniques in treatment of long superficial femoral artery occlusions  
Mikhail Chernyavskiy

We are asking all faculty members to strictly respect the given time limits.
